

ROTORAKE

The mechanical rake from AGRIMETAL is equipped with a revolutionary new style sweeper brush that solves the problem of removing gravel and stones from lawns during spring cleanup. Our rotor with swinging nylon hammers will amaze you at how well it works.

Our nylon hammers are gentle on grass, but will remove stones quickly and easily.

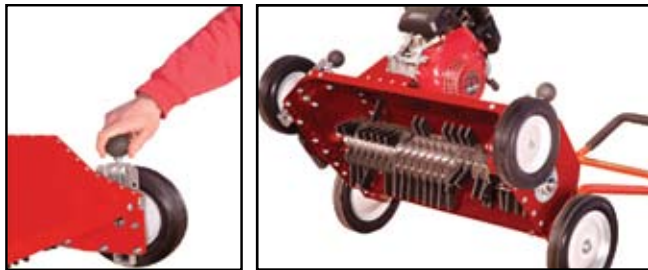

ROTORAKE removes all types of debris including gravel left after snow removal.

ROTORAKE works equally as well in reverse as a machine that breaks up aeration cores, and one pass is all that is necessary.

Currently available rubber sweeper brooms work alright on hard surfaces, but are not the answer for lawns or grass. If rocks and stones are the problem, our ROTORAKE is the ideal solution.

If you want a machine that is fast and reliable, low maintenance, yet affordable, look no further than the AGRIMETAL ROTORAKE.

Contact one of our dealers for more information or a demonstration. You will love this machine.
